

PROFITPLUS Cloud ERP - GRM GARMENTS MANUFACTURING

- Struggling with your garment manufacturing business using basic software?
- Facing rising customer demands for cost, quality, and timeliness?

While the industry can be highly profitable, it is also fraught with various challenges and complexities that require effective management to navigate. With our ProfitPlus Cloud ERP - GRM garment manufacturers can position themselves for long-term success in an ever-evolving industry and offer a comprehensive solution to address many of these challenges.

With our PROFITPLUS Cloud ERP - GRM, you can completely automate your business processes and gain full command over order execution, ensuring that you consistently meet customer demands in terms of cost, time, and quality.

Functional

Challenges & Solutions

Challenge 1

Staff Attendance: Updating various staff attendance records centrally and keeping the staff and system updated is a difficult task.

Solution

Our ERP system automates staff activities, including attendance, leave, and overtime. It calculates their attendance and personal details, centralizes documents in our ERP, making it easy to handle and process their wages/payments.

Challenge 2

Complex Global Supply Chain: Managing complex global supply chains involving multiple suppliers, manufacturers, and distributors effectively can be challenging. This includes ensuring timely delivery, maintaining quality standards, and managing inventory levels.

Solution

By implementing our ERP system, which supports centralized reporting and record-keeping, management can better connect the dots and prevent delivery failures from falling through the gaps.

Challenge 3

Revenue Management: Managing finances and tracking payment collections and contributions can be difficult for management.

Solution

Our ERP seamlessly handles this and provides more control over payment collection reminders and due date management.

Challenge 4

Demand Forecasting and Planning: Management strategy relies on business forecasting, but difficulties arise from information management and delays in decision-making due to incomplete analysis.

Solution

Dashboard reports and intelligent analytics serve as valuable indicators for management consultants to examine processes and generate "what-if" reports. Predictive analytics help identify demand at risk and deploy resources for improved success.

Challenge 5

Quality Management & Evaluation: Tracking production progress and evaluating quality against standards and norms can be challenging for industries.

Solution

Our ERP seamlessly handles this through process evaluation using the best QC module. This improves collaboration between production and QC departments, tracks quality metrics, performs inspections, and manages non-conformance, ensuring consistent product quality.

Challenge 6

Cost Control: Analyzing business data and managing cost control is a complex process.

Solution

Our ERP systems provide tools for tracking costs, managing budgets, and analyzing expenses. By monitoring and optimizing various cost factors, textile companies can make informed decisions to reduce costs and improve profitability.

Challenge 7

Streamlining Operations: Managing multiple departments and processes on time is challenging and prone to manual errors.

Solution

Aligning people, processes, and technology with user-friendly, cloud-based ERP systems can integrate various business processes, such as procurement, inventory management, production planning, and sales. This integration improves overall operational efficiency and reduces manual errors.

Challenge 8

Enquiry Management: Managing quote requests and inquiries from both direct customers and partners is a major activity in this industry.

Solution

Our ERP is equipped with an extensive enquiry process management system, including freight, transport, warehouse, and other activities.

Challenge 9

Maintaining Customer Relationship & Engagement: The daily documentation process and activities may not support maintaining relationships with customers, making it very difficult.

Solution

Implementing our ERP, which supports maintaining good customer relationships and updating them with the latest offers or engaging them with the brand, becomes much easier.

Challenge 10

Inventory Management: To avoid crises related to excessive or mishandled inventory, constant system evaluation is highly essential.

Solution

ERP software benefits companies in managing inventory by categorizing merchandise according to a self-organized apparel matrix, including price, size, color, style, vendor, etc.

PROFITPLUS⁺ Cloud ERP - GRM PRIVILEGES

- Handles the requirements of both Woven and Knit apparel industry.
- Provides for customized process sequence & program depending upon the garment specifications.
